
Wednesday 19th April 10.15 – 11.00

| | |
|---------------------|--|
| Oral Plenary | <i>Wolfson Hall</i> |
| | <p>O-01: Making sense of cancer signs and symptoms: the impact of intergenerational cancer narratives on people's help-seeking practices. <u>Trish Green</u>, Hull York Medical School, University of Hull</p> <p>O-02: General practitioners' involvement during and after colon cancer treatment <u>Laura Duineveld</u>, Academic Medical Centre Amsterdam, University of Amsterdam</p> <p>O-03: Breast Cancer Diagnosis and Treatment before and after High-deductible Insurance Enrollment <u>J. Frank Wharam</u>, Harvard Medical School and HPHCI Department of Population Medicine, USA</p> <p>O-04: Variation in 'fast-track' referrals for suspected cancer by patient characteristic and cancer diagnosis: Evidence from 670,000 patients with cancers of 35 different sites <u>Yin Zhou</u>, Primary Care Unit, University of Cambridge</p> |

Wednesday 19th April 11.30 – 12.15

| | |
|-----------------------|---|
| Oral Session 1 | <i>Wolfson Hall</i> |
| | <p><i>DIAGNOSTIC INTERVALS</i></p> <p>O-05: The CHEST Australia Trial: a Phase II randomised controlled trial of an intervention to reduce time to consult with symptoms of lung cancer. <u>Jon D Emery</u>, University of Melbourne</p> <p>O-06: General practice variation in multiple pre-referral consultations and the length of the Primary Care Interval in patients subsequently diagnosed with cancer: Evidence from a national audit <u>Theodosia Salika</u>, University College London</p> <p>O-07: Time intervals from first symptom recognition to diagnosis of head and neck cancers: A study based on a patient survey and linkage to primary care and hospital medical records <u>Osaretin Oviasu</u>, Hull York Medical School (HYMS)</p> <p>O-08: Does data from questionnaires and cancer registries agree on routes and time intervals to diagnosis? <u>Alina Zalounina Falborg</u>, Aarhus University</p> |
| Oral Session 2 | <i>GB Ong Room</i> |
| | <p><i>PATIENT FOCUS</i></p> <p>O-09: "Something I'd done for all those years had suddenly become more difficult": primary brain tumour patient perspectives on symptom appraisal and routes to diagnosis. <u>Clarissa Penfold</u>, University of Cambridge</p> |

| | |
|-----------------------|--|
| | <p>O-10: Health literacy and the pathway to diagnosis for oesophageal and gastric cancer <u>Elka Humphrys</u>, University of Cambridge, UK</p> <p>O-11: Linking risk perception with help-seeking: findings from focus groups with older adults <u>Sara MacDonald</u>, University of Glasgow</p> <p>O-12: Health literacy and mortality among breast, prostate, colorectal, and lung cancer patients in the ACCESS study <u>Robert Greenlee</u>, Marshfield Clinic Research Foundation, WI, USA</p> |
| Oral Session 3 | <i>Tausend Room</i> |
| | <p><i>INTERNATIONAL PERSPECTIVES</i></p> <p>O-13: Multiple Perspectives Analysis on Cancer Control in Akwa Ibom State – Nigeria: A Mixed-Methods Pilot Study <u>Kelechi Eguzo</u>, University of Saskatchewan, Saskatoon, and Nigerian Christian Hospital, Aba – Nigeria</p> <p>O-14: The impact of breast cancer diagnosis on the daily life of Omani women: A qualitative study <u>Mohammed Al-Azri</u>, Sultan Qaboos University</p> <p>O-15: Pathways to breast cancer care <u>Jennifer Moodley</u>, University of Cape Town</p> <p>O-16: Implementation of sustainable cervical screening in Malawi: perspectives of health care providers in rural health centres Christine Campbell, University of Edinburgh</p> |

Wednesday 19th April 14.25 – 15.10

| | |
|-----------------------|--|
| Oral Session 4 | <i>Wolfson Hall</i> |
| | <p><i>SOCIAL SCIENCE PERSPECTIVES</i></p> <p>O-17: Managing potential pre-cancer-states in the lungs: An ethnographic study <u>Michal Frumer</u>, Aarhus University</p> <p>O-18: Embodying the ‘Good Patient’: Navigating the competing demands of consulting promptly, whilst not ‘wasting the doctor’s time’, and the implications of this for practice. <u>Christina Dobson</u>, Durham University</p> <p>O-19: Goldilocks and the three health systems: the sociological ambivalence of being a ‘good cancer patient’ in Sweden, Denmark and England <u>Sue Ziebland</u>, University of Oxford</p> <p>O-20: Policy in action: how the dominant cancer narrative encourages implementation of cancer pathways <u>Rikke Aarhus</u>, Aarhus University</p> |
| Oral Session 5 | <i>GB Ong Room</i> |
| | <i>LUNG CANCER</i> |

| | |
|-----------------------|---|
| | <p>O-21: Vitamin B12 deficiency anaemia, a risk marker for non-metastatic lung cancer: a case control study <u>Marcela Ewing</u>, University of Gothenburg</p> <p>O-22: Implementation and evaluation of a lung cancer multidisciplinary team communication tool for general practitioners in NSW, Australia. <u>Nicole Rankin</u>, University of Sydney, Australia</p> <p>O-23: Lung cancer: trends in diagnostic interval <u>Sarah Price</u>, Exeter Medical School</p> <p>O-24: Talk about cigarette smoking: a cross country comparative analysis of patients newly diagnosed with lung cancer in Denmark, England and Sweden <u>Senada Hajdarevic</u>, Umeå University, Sweden</p> |
| Oral Session 6 | <i>Tausend Room</i> |
| | <p><i>SURVIVORSHIP</i></p> <p>O-25: How to consider the social and material resources of ‘survivors’ after primary treatment for cancer: looking for clues using photo elicitation <u>Alison Bravington</u>, Hull York Medical School, University of Hull</p> <p>O-26: Qualitative Analysis of Cancer Patients’ Experiences of Their Illness: Developing a Comprehensive Metanarrative <u>Peter Lewis</u>, Penn State College of Medicine, USA</p> <p>O-27: Cardiac rehabilitation to increase physical activity among cancer patients: is it feasible and acceptable? <u>Gill Hubbard</u>, University of Stirling</p> <p>O-28: Does early breast cancer treatment amplify risk of cardiac dysfunction in addition to other cardiac risk factors? <u>Saskia Maass</u>, University of Groningen</p> |

Thursday 20th April 10.05 – 11.15

| | |
|-----------------------|--|
| Oral Session 7 | <i>Wolfson Hall</i> |
| | <p><i>AWARENESS</i></p> <p>O-29: Cancer Research UK Strategic GP Lead Programme: Improving cancer awareness and care from practice to network level. <u>Lindsay MacDonald</u>, Cancer Research UK</p> <p>O-30: Working with Primary Care to improve cancer outcomes: The Cancer Research UK Facilitator Programme <u>Lindsay MacDonald</u>, Cancer Research UK</p> <p>O-31: Raising adolescent cancer awareness and cancer communication in families <u>Gill Hubbard</u>, University of Stirling</p> <p>O-32: The spectrum of presenting symptoms of cancer patients and symptom-specific diagnostic intervals: a review of current evidence to help guide the targeting of early diagnosis initiatives</p> |

| | |
|-----------------------|--|
| | <p><u>Minjoung Monica Koo</u>, UCL</p> <p>O-33: Symptom Awareness in Paradoxical Cancer Mythologies <u>Sara Marie Hebsgaard Offersen</u>, Aarhus University</p> <p>O-34: Women from higher educational backgrounds are more ‘symptom aware’ but less likely to anticipate seeking help for an unfamiliar breast cancer symptom: a vignette-based study <u>Katriina Whitaker</u>, University of Surrey</p> |
| Oral Session 8 | <i>Tausend Room</i> |
| | <p>SCREENING</p> <p>O-35: Interventions to improve the uptake of cervical cancer screening among lower socioeconomic groups: a systematic review <u>Imogen Rees</u>, Hull York Medical School (HYMS)</p> <p>O-36: Socioeconomic inequalities in colorectal cancer screening participation in the population-based programme in Barcelona <u>Mercè Marzo</u>, IDIAP Primary Care Cancer Research Group, Barcelona</p> <p>O-37: Factors associated with screen-detected breast cancer across five Canadian provinces: a CanIMPACT study <u>Marcy Winget</u>, Stanford School of Medicine</p> <p>O-38: Safety netting in healthcare consultations: A scoping review <u>Daniel Jones</u>, Hull York Medical school</p> <p>O-39: Comparative analysis of patient interviews about their lung or bowel cancer diagnosis in England, Denmark and Sweden: The use of safety-netting in primary care <u>John I MacArtney</u> University of Oxford</p> |
| Oral Session 9 | <i>GB Ong Room</i> |
| | <p>OUTCOMES</p> <p>O-40: Predicting prostate cancer progression: Associations between routine primary care data and prostate cancer outcomes <u>Sam Merriel</u>, University of Bristol</p> <p>O-41: Prognosis of cancer in relation to a person’s habitual consultation pattern in general practice <u>Henry Jensen</u>, Aarhus University</p> <p>O-42: Multimorbidity and Cancer mortality in UK Biobank data: A nationally representative cohort <u>Bhautesh Jani</u>, University of Glasgow</p> <p>O-43: Multimorbidity over time among childhood, adolescent, and young adult cancer survivors in British Columbia, Canada <u>Mary McBride</u>, Cancer Control Research, BC Cancer Agency</p> <p>O-44: Short-term breast cancer survival in relation to ethnicity, stage, grade and receptor status: national cohort study in England <u>Henrik Møller</u>, King's College London</p> <p>O-45: The Primary Care Collaborative Cancer Clinical Trials Group – looking back to move</p> |

forward
Kristi Milley, University of Melbourne

Thursday 20th April 13.45 – 14.40

| | |
|------------------------|--|
| Oral Session 10 | <i>Wolfson Hall</i> |
| | <i>DIAGNOSIS IN PRIMARY CARE</i> O-46: Diagnostic Journeys in Myeloma (DJiM): Quantifying intervals to diagnosis and assessing influences in the timely diagnosis of myeloma <u>Tania Seale</u> , Bangor University O-47: The breast cancer diagnostic interval across five Canadian provinces: a CanIMPACT study <u>Patti Groome</u> , Queen's University, Canada O-48: Improved survival and lead-time bias in standardised cancer pathways: a study of incident cancer patients diagnosed through Danish primary care <u>Henry Jensen</u> , Aarhus University O-49: Does access to health services influence the diagnostic pathway and outcomes from eight common cancers? Analysis of a linked dataset based on the NASCAR cohort. <u>Peter Murchie</u> , University of Aberdeen O-50: Associations between pathways to diagnosis and care experience for patients with colorectal cancer: Evidence from linked data <u>Theodosia Salika</u> , University College London |
| Oral Session 11 | <i>GB Ong Room</i> |
| | <i>PRACTICE AND POLICY</i> O-51: Relationship between abdominal symptoms and cancer in the abdomen: cohort study in primary care with prospective registration of cancer, in six European countries. <u>Knut Holtedahl</u> , Tromso University O-52: Weight loss as a diagnostic feature of cancer in primary care: a systematic review and meta-analysis. <u>Brian D Nicholson</u> , University of Oxford O-53: Testicular cancer in primary care: identifying a symptom profile and quantifying risk using electronic patient records. <u>Prof Willie Hamilton</u> , Exeter Medical School O-54: Variations of primary care consultations and symptoms by socio-demographic patient characteristics and impact on emergency colorectal cancer diagnosis: A longitudinal data-linkage study in England <u>Cristina Renzi</u> , University College London O-55: Policy and Practical Impact of Cancer Related Research in General Practice <u>Søren Gray Worsøe Laursen</u> , Danish Cancer Society |

| | |
|------------------------|--|
| Oral Session 12 | Tausend Room |
| | <p><i>SURVIVORSHIP AND PALLIATIVE CARE</i></p> <p>O-56: Transition to primary care follow-up: Preliminary results of a survey of early-discharge breast cancer survivors in southeastern Ontario <u>Marian Luctkar-Flude</u>, Queen's University, Canada</p> <p>O-57: Pilot study of a Primary Care Nurse led model of Advance Care Planning <u>Joel Rhee</u>, The University of Notre Dame Australia</p> <p>O-58: A qualitative investigation of health and medical professionals' attitudes to socio-economic factors when delivering care at the end of life <u>Christopher Dalglish</u>, Hull York Medical School</p> <p>O-59: Development and validation of an algorithm to identify cancer recurrence using Danish national patient registries <u>Linda A Rasmussen</u>, Aarhus University</p> <p>O-60: A novel theory-based digital app to optimise cancer pain management <u>Rosalind Adam</u>, University of Aberdeen</p> |
